

# SCALE

Scalability, Capacity, and Learning Engagement

Need a mathematics intervention plan for your 4th and 5th graders?  
We have a solution... and we pay you! 

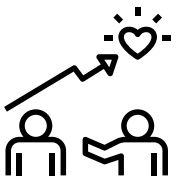

Educators who participate in Project SCALE will...

Provide evidence-based Tier 2 fraction intervention

Participate in about 9 hours of professional learning

Receive ongoing coaching and support

Take pre- and post- surveys

We want to support general education and special education teachers, instructional aides, small group tutors, or interventionists with pandemic recovery.

## What is the intervention?

*Fraction Face-Off!* is a What Works Clearinghouse approved intervention program designed by Dr. Lynn Fuchs at Vanderbilt University.

There are **36 sessions, each about 30 minutes and taught 2-4 times a week.**

WWC Brief

## EDUCATOR BENEFITS

- Increase confidence in teaching fractions through professional development and coaching
- Trusted intervention that works with all materials and prizes provided
- Minimal prep to implement intervention
- Supports student success without adding to teacher's workload
- Payment for participating

## STUDENT BENEFITS

- Learn strategies for solving fraction problems aligned to state standards
- Build conceptual understanding of part-whole and magnitude through number lines
- Play games and win prizes which support student motivation
- Better prepared for future math achievement
- Increase confidence in mathematics
